Education

Dr. A.P.J. Abdul Kalam Technical University *Sept 2024 – Present*
B.Tech in Computer Science

- CGPA: 8.16 / 10

Experience

Technical Operations And Automation Intern *Jun 2026 – Aug 2026*
Chess Gaja

- Architected 15+ event-driven webhook pipelines across CRM, web forms, and messaging gateways, reducing lead ingestion latency from hours to under 30 seconds.
- Designed and deployed deterministic lead-validation workflows with automated deduplication and regex sanitization, eliminating invalid entries and cutting manual verification effort by 80%
- Configured failure-handling and notification paths in CRM automation workflows to surface unsuccessful runs and support manual recovery.

AI/ML Training And Project Program *Jan 2026 – Feb 2026*
Mirai School of Technology

- Completed an AI/ML training program covering LLM API integration, prompt engineering, and multi-step automation workflows.
- Built multi-step n8n workflows connecting API triggers and conditional logic to automate AI-oriented tasks during the training program.

Projects

Knowledge Retrieval System: RAG, Embeddings, n8n, LLM APIs

- Implemented a document-question-answering pipeline using n8n, embeddings, vector search, and LLM APIs to retrieve relevant document context and generate responses.

CortexLoop: Human-AI Reasoning and Decision Framework

- Developed a four-stage human-in-the-loop workflow separating initial responses, AI critique, evidence exploration, and final decisions.
- Added structured comparison of pre- and post-AI responses to surface unsupported assumptions, alternative hypotheses, and changes in stated conclusions.

AI Voice Booking Assistant

- Built a voice-based AI assistant using Google AI APIs to process spoken user requests and automate meeting scheduling.
- Integrated speech processing with booking workflows to capture meeting details and execute scheduling operations through API integrations.
- Developed an end-to-end conversational booking flow, enabling users to schedule meetings using natural voice interactions.

Certification

AWS Cloud Solutions Architect
IIT Mandi - Intensive Certification Program in AI/ML Fundamentals and Applied Projects

Technologies

Languages: Python, SQL, C++
Automation and Integrations: n8n, REST APIs, Webhooks, Zoho Bigin, Zoho Flow
Data and Retrieval: MySQL, ChromaDB, FAISS, Embeddings, RAG
